We do not hesitate to say that, not only was all the power of official patronage brought to bear on it, but MONEY-ave MONEY was freely expended in the effort to make the bogus Convention a manufactory of this nefarious villainy. We would add that, on the night of Friday, the 6th, a messenger was dispatched to the Executive's as their agents in the Convention, as without it the design might fail. Need we add that the fresh subsidy was forthcoming, and that thus was the result secured.

Nor was this all. There were members submitting the Constitution itself to the people. In order to secure these, a provision to submit the Constitution was incorporated in this scheme, and after the votes of these delegates had been thus fraudulently obtained, and the matter carried this way, set about their last great struggle, and by swindling and barefaced corruption struck that, it's only fair provision, out, and thus left it in the very worst condition. But the degradation of the administration men was ed that the Constitution be itself submitted, if there was any submission. The people have just emerged from a struggle in which they had, to some extent, to soil their political principles at the behests of their friends. I suppose that you have learned that the great "National Democratic" principles of "Squatter Sovereignty," as "enunciated in the Kanzas Nebraska bill," are about to be finally carried out, and that the fanatical rebels, who want to make it an "Abolition State," are not to be permitted to vote on the Constitution. That's what I call true "conservatism." It's "Democracy" whittled to a point. To keep up appearances there is to be a dodge submission. It's got up on the principle of "tweedle-dum and tweedle-dee," and has triumphed by a great expenditure of whisky and secret service money. It means that if you vote "for Constitution with Slavery," that it is a bogus Slave State, and if you vote "for Conscitution without Slavery," that we get this same bogus Constitution with a slave State. It's the cunningest thing that was ever got up. You can't tell which is which. It is expected that all the "Abolitionists" will hurry up, thus to ratify the Constitution and save ye Pro-slavery party, ye Demo-cratic party, and ye Isothermal Governor. This plan is reported to be the creation of R. J. Walker, and it has been styled "Iso thermal submission."

The Isothermal election is to be on the 21st of December, and the State election on the first Monday in January. The Regent is to manage these elections. He is to appoint three county Commissioners for each county, as the Abolitionists carried the Territorial officers. The election is to be by ballot. There is to be no certified returns, but the poll books on which the names are entered is to be sent up to the Prince Regent, who, like another Daniel, is to be able to tell how these men voted, to determine
